-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 June 2003.
2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Paper No(s)/Mail Date. _____.
5) ☐ Notice of Informal Patent Application (PTO-152)
6) ☐ Other: _____.

DETAILED ACTION

Election/Restrictions

1. Claims 17-108 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected claimed inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on December 03, 2004.

Applicant's election with traverse of group I in the reply filed on December 03, 2004 is acknowledged. The traversal is on the ground(s) that group II should be examined with group I. This is not found persuasive because specific determination steps and control method are claimed necessitating further search or considerations not required for group I.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 5 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5 recites the limitation "said controller" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 7 recites the limitation "said safety" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3 and 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Matsumoto (US 4,976,330).

Regarding claims 1-3, Matsumoto discloses a system for a vehicle (figure 1) having at least one wheel (8R, 8L, 12R, 12L) comprising:

a first roll condition detector (28) generating a first roll condition signal (figure 2);

a second roll condition detector (13) generating a second roll condition signal (figure 2);

a third roll condition detector (27) generating a third roll condition signal (figure 2); and

a determination means (34) for passively determining wheel lift in response to the first, second, and third roll conditions (col. 4, lines 24-37).

Regarding claims 5-6, Matsumoto discloses a controller (30) generating and responding to a potential rollover signal in response to the wheel lift signal (col. 3, lines 40-54 and col. 4, lines 45-56).

Regarding claim 7, Matsumoto discloses the controller providing braking during a liftoff condition (col. 5, lines 15-30).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Matsumoto (US 4,976,330).

Regarding claim 4, Matsumoto discloses lift-off determining means being responsive to the degree of acceleration (col. 3, lines 40-54 and col. 4, lines 45-56). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have the roll condition signals also provide a degree indication in order to rapidly respond to adverse conditions.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tai T. Nguyen whose telephone number is (571) 272-2961. The examiner can normally be reached on Monday-Friday from 7:30am-5:00pm..
